## CAREER OBJECTIVE

### OVERVIEW

Frontend focused Full Stack Developer with 3+ years of experience owning and architecting scalable web interfaces using React, Next.js, and TypeScript. Experienced in transforming product requirements into intuitive, accessible UI/UX while improving performance through clean component design and optimization.

## PROJECTS

### TattooDesignPro

LIVE

- Led the frontend development from concept to production.
- Improved user experience with optimized performance and UI.
- Integrated REST APIs to connect frontend with backend services.
- Implemented dynamic UI features for personalized tattoo previews.

### EireneCremations

LIVE

- Integrated REST APIs for real-time data handling.
- Built dynamic UI flows for smoother interactions.
- Collaborated with the team on requirements and UX.
- Optimized frontend rendering for improved performance.

### WordRocket

LIVE

- Developed SEO-friendly UI templates for content teams.
- Implemented AI-driven UI features to improve efficiency.
- Integrated REST APIs to enhance user-facing functionality.
- Improved frontend interfaces for better usability and accessibility.

## Experience

### Front End Engineer

Auxo Solutions • Brookline, MA, United States (Remote)

NOV 2024 - NOV 2025

With Auxo Solutions, I build scalable frontend applications using Next.js and TypeScript. I develop core UI features, integrate backend APIs, and optimize interface performance to enhance user experience. I collaborate closely with cross functional teams to deliver production ready interfaces and improve platform efficiency.

### Front End Engineer

Eirene Cremations • Regina, Saskatchewan, Canada (Remote)

MAR 2023 - APR 2024

At Eirene Cremations, I focused on building frontend features like a deceased status checker and dynamic forms for listing information. I also developed internal UI tools, integrated backend APIs, and collaborated with the team to ensure a smooth and intuitive user experience.
